Dr.Cama has worked miraculous cures in people's lives such as curing cancer and other chronic conditions. "We are spirits and these are afflictions of the body - there is no reason for disease to be there as body cells are renewed every few weeks," she says. Disease is what our mind harbours and we infuse it back into our new cells, so the condition becomes chronic. In the end, it is really a matter of acknowledging that one is a spirit in this world, and of viewing this body as a vehicle that holds the spirit.

Dr Cama does consultations in person/over the phone/via email and then custom-records CDs herself for her clients.
